Medstar Laboratory, Inc.  
Attn: Mr. Neal Patel  
7716 Madison Ave.  
River Forest, IL 60305

Dear Neal,

I would like to share my story with you concerning my prostate (PSA) results, after Davinci surgery at the University of Chicago. My 3 month follow up PSA performed by your lab, Medstar, was .02nenogram/ml. My Urologist at UC was concerned about the ability to factor PSA lower than the normal scale of their lab which is .05nenogram/ml (considered a trace value, no need for radiation therapy). Once they were able to confirm your value of .02nenogram/ml, the chief at the University of Chicago Urology department was impressed at your laboratory's accuracy, that his PA personally called me and praised the laboratory I used. They and I were very pleased, my compliments to your lab, keep up the outstanding work!

Best Regards,

Robert Jordan, M.D.
