To Whom It May Concern:

*Working for a very busy OB/GYN practice, I personally can appreciate the convenience of a lab that can get the job done. If there is any problem or special circumstances that need to be handled immediately, I always know that I can make a phone call to Raj or Neal Patel, and the matter is handled with the utmost attention.*

*I have noticed that Medstar Lab is growing in leaps and bounds, and I still can say that they give me the same special attention, that they always have, even in the very beginning. With great satisfaction, I would like to express my recommendation of Medstar Laboratory. Medstar has always provided us with precise results, and also a very good turn around time on our results.*

*I have recommended this lab to many of the Physician's offices that I deal with every day, and I will continue to encourage other offices to try our great lab.*

Sincerely,

*Donna M. Peterson*
